# International Symbiosis Congress

Jerusalem, November 17-22, 1991

The program will be arranged to encourage comparative discussions in different symbiotic systems and is therefore planned according to topics rather than types of symbiosis. There will be plenary lectures, parallel symposia, workshops, poster sessions and commercial exhibits. Posters will remain on display throughout the Congress.

## *Topics*

Nutritional interactions, carbon and nitrogen metabolism  
Transport mechanisms  
The host-symbiont interface  
Mutual regulatory and morphogenic effects and structural coadaptation  
Regulation of symbiont population  
Recognition and specificity  
Molecular genetics of symbiotic interactions  
Symbiosis and genetic exchange  
Trophic links, recycling and conservation  
Transmission of symbionts  
Symbiosis and development of new structures and functions  
Evolutionary consequences of symbiosis  
Ecological adaptations  
Ecology of the rhizosphere
